AURORAVILLAGE.COM

Aurora Village was developed with one view in mind and that view is probably the most spectacular one you'll ever see: the Arctic Northern Lights. This unique operation is located on Aurora Lake, a short 30 -minute drive from downtown Yellowknife. Our heated teepees offer a welcome glow on arrival and a place to meet new friends and share a warm beverage before heading out under the blazing skies.

Your viewing possibilities are endless: from teepee to hilltop to the wide expanse of frozen lake with comfortable folding chairs for your viewing pleasure. As an added treat try our Aurora Kotatsu Heated Seats. These innovative chairs allow two people to sit for hours in freezing temperatures and have the added features of 360-degree rotation and recline function.

You can pack in a lot on one of our tours. Take a dog team ride under the dancing lights or learn to make a traditional dream-catcher. An on-site photographer is available to ensure your experience will never be forgotten and our gift shop has stunning images for those friends back home. Complete your evening with a hot snack and beverage and share your excitement with other Aurora gazers. We have packaged tours to make your experience memorable but are more than happy to design tours that accommodate your particular needs.
